Raw Data & Print Reports

Read before you download: We are committed to protecting the privacy of our customers. By downloading any raw data or reports, you hereby indicate that you are the owner of that data or have permission to download the data, and you further indicate your understanding that FamilyTreeDNA cannot in any way guarantee the security or privacy of your downloaded data. Furthermore, you understand that by uploading your raw data to a third party application and linking it to your name, FamilyTreeDNA kit number, email address, or any other identifying information, the security of your raw data and record is further put at risk and may lead to the violation of FamilyTreeDNA Privacy Policy. By downloading your raw data, you assume the liability for any breach of privacy and release FamilyTreeDNA from any privacy violation that results either directly or indirectly from the downloaded raw data and/or upload to a third party application.

The Family Finder raw data file contains your DNA results code (A, C, T, G, etc.) for each of the thousands of locations tested. It is most useful for those advanced users who wish to compare specific segments of their DNA with others. [More Info.](#)

Because they contain the results for thousands of SNPs, Family Finder autosomal DNA and X-Chromosome raw data files are large. They have been compressed for faster download. There are many free programs available on the internet for extracting GZIP files. [More Info.](#)

Build 37 Autosomal Raw Data (GZIP, CSV) | Build 37 X Chromosome Raw Data (GZIP, CSV) | Build 37 Concatenated Raw Data (GZIP, CSV)
